August 10, 2018

Waukesha, WI - Neurotech, LLC is proud to announce and welcome Dr. Michelle Dougherty as the company's new Chief Medical Officer. Dr. Dougherty will be responsible for research and strategic planning, protocol review and development, professional growth, development and training of EEG technologists, EEG interpretation, and overseeing Neurotech's new ICU EEG service line, Neurotech cEEG Partners, LLC.

Dr. Dougherty most recently served as the Epilepsy Program Director, Assistant Professor of Neurology, and Director of the Neurology Residency Program at the Drexel Neurosciences Institute in Philadelphia. She received her post-graduate training at Rhode Island Hospital and Brown University and completed her EEG and epilepsy fellowship at the Cleveland Clinic. Following this time, she practiced at Einstein Healthcare Network and Capital Health in New Jersey.

"Dr. Dougherty brings over 15 years of experience in epilepsy and EEG. Her innovational mindset and high ethical integrity will strengthen our organization and enhance Neurotech's future endeavors related to epilepsy and EEG testing," says Keith Morgan, Founder and CEO of Neurotech, LLC.

Dr. Dougherty is excited to start her work at Neurotech and looks forward to helping provide care to patients in a more expedient way and providing faster and better outcomes for hospitals and physicians. She wants to help supplement the wonderful care that Neurotech's critical partners are already delivering to their patients.
